

# Windows

## Enable Windows Hello Biometric Active Directory Logon for Windows Server without Azure AD

Set the following items on a group policy for an OU containing the computers you want to allow, i.e. TLD.local/Org/Workstations

**Note that users MUST set up a Windows PIN before biometric methods can be used.**

### Computer Configuration (Enabled)

<b>Policies</b>			hide
<b>Administrative Templates</b>			hide
Policy definitions (ADMX files) retrieved from the local computer.			
<b>Network/Network Connections/Windows Firewall/Domain Profile</b>			show
<b>Printers</b>			show
<b>System/Logon</b>			hide
<b>Policy</b>	<b>Setting</b>	<b>Comment</b>	
<a href="#">Turn on convenience PIN sign-in</a>	Enabled		
<b>Windows Components/Biometrics</b>			hide
<b>Policy</b>	<b>Setting</b>	<b>Comment</b>	
<a href="#">Allow domain users to log on using biometrics</a>	Enabled		
<a href="#">Allow the use of biometrics</a>	Enabled		
<a href="#">Allow users to log on using biometrics</a>	Enabled
