## Force a PJSIP Endpoint to Check for Configuration

Use this command in the remote asterisk console (asterisk -rv) to force an endpoint to check config. In the example, this is for digium phones. The full listing of /etc/asterisk/sip\_notify\_additional.conf (commands for other phones) is listed below.

```
pjsip send notify digium-check-cfg endpoint <extension #>
```

Remove the brackets when entering the command above!

```
[astra-check-cfg]  
[cisco-check-cfg]  
[cortelco-check-cfg]  
[digium-check-cfg]  
[grandstream-check-cfg]  
[htek-check-cfg]  
[linksys-cold-restart]  
[linksys-warm-restart]  
[obihai-check-cfg]  
[polycom-check-cfg]  
[polycom-reboot]  
[sangoma-check-cfg]  
[sipura-check-cfg]  
[reboot-snom]  
[spa-reboot]  
[reboot-yealink]  
[algo-check-cfg]  
[snom-check-cfg]  
[snom-reboot-cfg]  
[fanvil-check-cfg]
```
