Ubiquiti

UptimeRobot IP Address Updater Template for EdgeOS

Use the attached template to update Uptime Robot allowed IPs on an EdgeRouter network group.

Firewall rule to allow ICMP via UptimeRobot:

```
set firewall name WAN_LOCAL rule 21 action accept
set firewall name WAN_LOCAL rule 21 description 'Allow UptimeRobot ICMP'
set firewall name WAN_LOCAL rule 21 log disable
set firewall name WAN_LOCAL rule 21 protocol icmp
set firewall name WAN_LOCAL rule 21 source group address-group UptimeRobot
```

You can find links to text files to paste in here:

- [IPv4](#)
- [IPv6](#)
- [IPv4 and IPv6 combined](#)
