Hardware

Fixing Error SWC0066 When Connecting to Dell Repository for older iDRAC/Lifecycle Controllers

Dell has retired **ftp.dell.com**, so FTP updates are no longer available. You may receive a SWC0066 error if you don't provide the file path for HTTPS updates.

Select the file share update selection (HTTPS), use **HTTPS** and the address: **downloads.dell.com**

Important: For the file path portion, use: **/catalog**
