

# Microsoft 365

## Add or Modify NDR for MS 365 Distribution Group

Enter the following commands in powershell after connecting to 365. This will allow for messages sent from a distribution group email address to issue an NDR to the manager of the group.

Get group information:

```
Get-DistributionGroup "groupname@domain.com" | FL
```

Set up NDR:

```
Set-DistributionGroup "ndrrecipient@domain.com" -ReportToOriginatorEnabled $false  
Set-DistributionGroup "ndrrecipient@domain.com" -ReportToManagerEnabled $true
```
