

Windows

Stop Windows Search Service From Slowing Down During User Activity, Disable BackOff

Use the following registry entries to toggle between full-speed, non slowed search indexing and default behavior.

Full speed indexing, with no "backoff":

```
Windows Registry Editor Version 5.00
[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows Search\Gathering Manager]
"DisableBackOff"=dword:00000001
```

Default indexing, with "backoff":

```
Windows Registry Editor Version 5.00
[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows Search\Gathering Manager]
"DisableBackOff"=dword:00000000
```
